

Programme: SOCPL-2024-SOC-DIALOG

TRANS4M

Transcending Resilience and Sustainability for Modernizing Employment is a European project that addresses the key challenges faced by small and micro enterprises in the context of the green transition and digitalisation. The project aims to strengthen resilience and promote sustainable development within the craft and small business sector through enhanced social dialogue, capacity-building activities, and the development of innovative support tools.

Project Objectives

- Strengthen the skills and competencies of social partners.
- Develop tools and resources to support companies in adapting to the green and digital transitions.
- Enhance social dialogue between entrepreneurs and policymakers.
- Increase awareness of sustainable practices and implement them across selected sectors (opticians, hospitality, floristry, goldsmithing and jewellery, retail).
- Trigger systemic changes in labour market policies and strengthen transnational cooperation among project partners across the EU.

Budget and Funding

Total project budget: € 566,017,16
EU co-funding: € 509.415,44 EUR

Funded by
the European Union
